

Saketh Marrapu

10224 Chestnut Ridge rd. ♦ Austin, TX 78726 ♦ (737)-274-7287 ♦ smarrapu05@tamu.edu

EDUCATION

Texas A&M University, College Station, Texas

August 2022 - December 2026

Bachelor of Science in Statistics

GPA: 3.918

Minors in Computer Science, Economics

Texas A&M University, College Station, Texas

August 2025 - December 2026

Master of Science in Data Science

GPA: 3.918

EXPERIENCE

ENDEAVR

June 2026 – Current

Data Science Intern

- Worked on the data pipeline for an AI based self-driving model for rural towns
- Created the schema for splitting data into training, testing and evaluation using python

RESEARCH

System Dynamics Modeling for Bovine Respiratory Disease

June 2026 – Current

- Applied AI modeling for Bovine Respiratory Disease with Adeolu Adekunle
- Built a web dashboard for a vensim system dynamics model with Python and HTML

BART treeShap Implementation

May 2025 – August 2025

- Expanded understanding in academic implementation under the tutelage of Dr. Huiyan Sang
- Implemented the fast tree SHAP algorithm for Bayesian Additive Regressive Trees using C++ and R

SPACES Study

February 2025 – February 2026

- Collaborated with Dr. Tyler Prochnow and a team to implement social network analysis
- Prepared a data transformation pipeline for exploratory data analysis (EDA) using R and Python

PROJECTS

Enzyme Classification Using Graphs

January 2026 – May 2026

<https://github.com/smarrapu05/stat656final>

- Explored the performance of graph based traditional machine learning methods to GNNs for classifying enzymes
- Created a GCN and GAT architecture in base pytorch along with the convolution and attention mechanisms

Protein Folding Analysis

August 2025 – December 2025

<https://github.com/smarrapu05/STAT636final>

- Analyzed network statistical properties of proteins and how they fold in R and python
- Implemented adjacency spectral analysis to identify difference in the functions of residues across proteins

Analyzing Efficiency of Rail Transport

August 2025 – December 2025

<https://github.com/smarrapu05/STAT482final>

- Researched the relative qualities of rail in the EU across different factors such as safety and travel time
- Extrapolated possible positive effects of implementation of rail in the US with predictive mixed methods

Competitive Esport Predictive Analysis

December 2024

<https://github.com/smarrapu05/valPredictive>

- Adapted predictive methods to a new esport (VALORANT) to predict future match outcomes
- Expanded current sports analysis methods to new applications in the esports world

ACTIVITIES

Index Fund Research

January 2024 – April 2024

- Modeled options trading using Geometric Brownian motion
- Proposed and implemented an index fund motivation based on current market trends

CFB Stocks

January 2025 – May 2025

- Helped create an app that tracks college football team performance in the form of stock values
- Implemented a logistic based prediction algorithm to create odds for which team will win a match

SKILLS

- R
- C++
- Python (PyTorch, Tensorflow, pandas, seaborn)
- SQL
- HTML
- Excel
- Git
- Docker
- AWS
- Linux
- x86-64 Assembly
